[\(563\) 349-3979](tel:5633493979)

Profile

Quality-driven and results-oriented software engineer with deep roots in test-oriented development. Equal focus on minor details and overarching software architecture, with a constant eye for edge-cases. A fast learner and hard worker with a passion for developing quality software by doing things “the right way”. Works well in teams or individually, preferably in quiet and with coffee.

Education

B.S. Computer Science

University of Iowa

Iowa City, IA

Graduated December 2019

Relevant Coursework:

- Object Oriented Software Design
- Operating Systems
- Programming Language Concepts
- Computer Security
